Volunteer Recruitment and Diversity, Equity and Inclusion

- Why are we creating more diversity among this group?
- What are our targets? (i.e. general increase in diversity, align with identities of current alumni, or align with identities of current students)
- What aspects of diversity are most important for the council/group right now? Gender, race, geography, industry, other identity (first gen, sexual orientation, veteran, etc.)
- What are our usual research/identification/nominations process? How can we make these more accessible, inclusive, and open to communities that would reflect the type of diversity we are seeking to achieve?
